

Fiscal Officers Network

Fiscal Officers Meeting, Impacts & Annual Report Guidance, and NIMS Training

During the week of April 21 there will be a series of workshops held in collaboration with the NSGO in Silver Spring. These workshops are open to the entire network.

NIMS Training: Fiscal officers, Research Coordinators and other users will receive technical assistance in understanding the NIMS system as well as give NSGO valuable input for adapting the system into a comprehensive, user friendly tool.

Performance Measures, Impacts and Annual Report Guidance Update: This session is open to all to receive ongoing guidance and perspective from the NSGO for measuring the performance and impacts of projects, as well as receiving the latest information about the 2007-2008 Annual Program Report.

Grants Management 101: Due to budget constraints the NOAA GMD cancelled their grants management workshop this winter. This is unfortunate as the policies, conditions and restrictions of grants management are ever changing. With the assistance of the NSGO and NOAA Grants Officer, Rich Fales, the Fiscal Officers will hold a Grants Training 101 workshop and business meeting Silver Spring this week. This workshop will be especially helpful for new fiscal managers for not only will they receive the latest information from NOAA Grants Management, but they will participate in a lively informative discussion with other fiscal officers.
